

REVIEW
educational-scientific programme
the third (postgraduate) level of higher education
AREA of expertise 07 Management and administration
SPECIALTY Management 073

On reviewing the educational and scientific program of the third level of higher education knowledge area 07 "Management and administration" specialty 073 "Management", developed by the design group in Kiev National University of construction and architecture of Ukraine. In terms of reforming the state, many of the sectoral reforms in all spheres of public life actualise area the task of providing quality education project management. The scientific training of such specialists should be focused on the formation of competences necessary for the implementation effective, efficient implementation of projects and programs for sustainable development of the country based on international and European standards. However, the realization and implementation of projects and programmes of this level, which certainly, any reform faces an important factor that directly affects the efficiency of implementation is a definite understanding specific goals, objectives of the project or program and definite use of this level of management, namely the management level interaction, i.e. on the level of mental space.

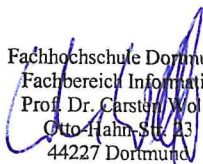

The existence of a common understanding and the application of a single template for the management of mental space separation and transformation of hidden knowledge in the available knowledge, accounting the peculiarities of the Ukrainian mentality should significantly improve the results implementation of national projects and programs. It presents educational and scientific program of the third level is aimed the training of specialists with advanced level of competence for the solution complex scientific problems for the management of projects and programs. The program is practice-oriented, that is, one which is focused on real needs reform of the state, to meet the needs of business and public management of highly skilled project managers who are able to solve complex problems of

management in a fast-changing environment, and to educate future managers project methodology. All proposals that was provided during the consultation were taken into account in the updated only program.

Scientific aspects of the program are evaluated during international conferences where the students take part. Students have the possibilities to present and receive feedback on their researcher's results from the leading world's researchers during the PhD-schools, in the frame of Dortmund Summer Schools. Also, the students take part in the international academic mobility program from DAAD.

Given the content of this educational and scientific program, a high level ensuring the educational process and the needs of the state in highly qualified specialists in project management, I consider it appropriate to recommend the educational-scientific program of the third level of higher education in the field of knowledge 07 "Management and Administration" specialty 073 "Management" for the training of graduate students in this specialty at the in Kiev National University of construction and architecture of Ukraine.
