Letter of reference

Ukrainian Red Cross Society (URCS) hereby attests that the software developers Volodymyr Vyshniakov and Oleh Komarnytsky have brilliantly achieved the goal set by URCS – namely, they successfully created a system of electronic secret ballot voting, protected from electoral rigging, for annual elections of the URCS Commission for Volunteer Development and Youth Policy (December 4, 2020).

The system created by the developers has proved to be sufficiently flexible, workable and fraud-proof. Particularly, the developers have taken into account each suggestion made by URCS: individual authentication of each eligible voter, prevention of double voting, restricting time interval for voting process etc. They have provided all the necessary consultations, on an individual basis as well. Technical support provided was, invariably, swift and highly efficient, which allowed us to effectively cope with the numerous unexpected changes in the course of the election campaign. Owing to the “Research Institute for Automated Systems in Construction Sector” State Enterprise we were also granted access to necessary hardware and equipment, servers and resources.

Ukrainian Red Cross Society affirms its utter satisfaction with the quality of the services delivered by the aforementioned developers and declares the total absence of any complaints or reclamations concerning their work.

Ukrainian Red Cross Society
Director General

15.12.2020

Maksym Dotsenko
